

Aquaculture Contract Research

We are an established contract research organisation with extensive expertise in conducting efficacy and safety studies for veterinary medicinal products in aquaculture species.

Efficacy Testing

Disease model expertise including

- Salmon lice (*Lepeophtheirus salmonis*)
- Amoebic Gill Disease (*Neoparamoeba perurans*)

Safety Testing

- Vaccines
- Pharmaceuticals
- Feed additives

Environmental Safety Testing

- Bioaccumulation studies

Quality Assurance

- Expertise in GLP, VICH-GCP, GMP
- Regulatory compliant studies

Biosecure Testing Facilities

- Seawater
- Freshwater

Laboratory Facilities

- GLP accredited

For further information or to discuss a study please contact:
