

We are an established contract research organisation with extensive experience in conducting efficacy and safety studies for veterinary medicinal products in all species of livestock.

Efficacy Testing

- Broad range of disease models
- New model development
- Field studies
- Potency testing

Animal & Laboratory Facilities

- GLP accredited
- Containment category 3
- Specific pathogen free
- Farm accomodation

Target Animal Safety Testing

- Vaccines, pharmaceuticals, feed additives
- Milk and tissue residue studies
- Pharmacokinetic studies

Quality Assurance

- Expertise in GLP, VICH-GCP, GMP
- Regulatory compliant studies

Infectious Disease Models and Areas of Expertise

Bovine

Bovine Virus Diarrhoea Virus (BVDV)
Bovine Herpesvirus-Type 1 (BHV-1)
Parainfluenza Virus Type 3 (PI3)
Bovine Respiratory Syncytial Virus (BRSV)
Mannheimia (Pasteurella) haemolytica
Pasteurella multocida
Mycoplasma bovis
Histophilus somni
Neospora caninum
Staphylococcus aureus mastitis
Streptococcus uberis mastitis
Escherichia coli
Cryptosporidium parvum

Parasitic Disease

Endo- and ecto parasitic disease.
Natural and experimental infections.
Bovine, porcine, ovine, equine studies.

Aquaculture species

Salmon lice (*Lepeophtheirus salmonis*)
Amoebic Gill Disease (*Neoparamoeba perurans*)

Porcine

Actinobacillus pleuropneumoniae
Porcine Reproductive & Respiratory Syndrome Virus (PRRSV)
Streptococcus suis
Pasteurella multocida
Mycoplasma hyopneumoniae
Salmonella spp.
Escherichia coli
Porcine respiratory disease sequential challenge models (*M. hyopneumoniae* /*P. multocida*, *M. hyopneumoniae*/PRRSV)

Ovine

Mannheimia (Pasteurella) haemolytica
Chlamydophila abortus
Toxoplasma gondii
Staphylococcus aureus mastitis
Streptococcus uberis mastitis
Cryptosporidium parvum

Poultry

Salmonella enteritidis
Campylobacter jejuni
